Waldorf Astor, ex-minister to Italy, who is 42 years old, and well qualified to enjoy the immense estate which has fallen to his lot. The Astors, like the Vanderbilts, began life poor, but, by economy, frugality and great business sagacity, have been constantly adding to their property, until it is now among the most valuable in the United States. The history of the founder of this house reads like a romance, and furnishes a stirring example to the poor young men of this country, who have nothing to start with in the struggle for life but a sound constitution and a full supply of brains and pluck.

The Tennessee man who forged President Harrison's name and induced a colored man to go to Washington under the impression that an office worth \$100 a month was awaiting him there, deserves to be severely punished for his cruel joke. The poor colored man had no money to pay his return fare, and but for the kindness of Mr. Halford, the president's private secretary, he would have had to walk back. The forger, however, stands a good chance of prosecution, and when the president is finally heard from he may be very sorry for his boldness.

ODDS AND ENDS.

Students who use tobacco in any form are denied admission to the University of the Pacific at San Jose, Cal.

Ram fighting is said to divide with cock fighting the affections of those of sporting blood among the natives of Ceylon.

It is said that during the twenty years from 1867 to 1887, 6 per cent. of all the county records in the United States were destroyed by fire.

A bundle of spider webs, not larger than a buckshot and weighing less than a drachm, would, if straightened out and untangled, reach a distance of 350 miles.

A French woman has got up a public contest, the proceeds of which are to be devoted to the relief of the sufferers from the Antwerp fire, in which the prize is to be awarded to the woman who speaks the most words in one hour.

The King's College School Old Boys' club wrote asking Mr. Gladstone to become an honorary member, and received a postal card from him by declining the honor. The club promptly put the card up at auction and got six shillings three pence for it.

The total of the royal game bag of Prussia for 1888-89 was 16,932 head, as follows: Red deer, 1,032; fallow deer, 2,546; roe deer, 216; wild pig, 942; pheasants, 1,683; hares, 4,694; partridges, 2,532; wild geese, ducks and snipe, herons, etc., 747; foxes, 230; martens, 59; polecats, 130; weasels, 160; hawks, 549; various, 1,476.

In the newly discovered tombs near the Place de la Constitution, Athens, upon a skeleton was found a golden ring with a precious stone and a golden earring. In another tomb was found leaves of gold.

A new submarine ram vessel has a cylinder 15 feet long and 12 inches in diameter, the piston of which constitutes the ram proper and is driven by steam with a 100 ton blow. It is supposed to be able to punch a hole in anything afloat. The best result was made upon the deck of a man-of-war.

A new calculating machine has just been invented in France and obtained a gold medal at the exhibition. The inventor is M. Bollee, of La Mans, a clever mechanic, already very favorably known by other useful inventions. The machine does addition, multiplication and division with astonishing rapidity, and all by the turn of the wheel. M. Mascart recently gave an account of the invention before the Academy of Science.

An article called "cavassa starch" is attracting considerable attention in the Florida sub-tropical exhibition. A local paper says: "Northern men can hardly believe it is a Florida production, and when they learn that it was raised on a small garden plot and prepared by a simple, crude process, and learn how enormously it produces, and further, that it is an article not only for man, but for animals, they open their eyes in wonder."

The government of India has been compelled by law to purchase three copies of each new book issued in the country, and it has been discovered that a practice has grown up of printing new books simply for the sale of these three copies, for which any price within reason could be charged. A change is about to be made in the law, and hereafter the publishers will have to present the copies to the government.

There are many curious customs observed by the Brazilians. Funerals are notable in that for a young unmarried lady coffin, hearse and the liveries of the driver must be bright scarlet, the four white horses drawing the hearse must be covered with scarlet nets, and scarlet plumes must deck the horses' heads. No women go to the cemeteries. The mother, the widow, must not exhibit her grief in public.

On removing a granite block at St. Paul, Minnesota, a Roman flag was observed, which had apparently served as a cover to a box of wood, now fallen into decay. Inside was found over 10,000 small plated Roman coins of Valerian, Diocletian, Constantine, Maximian, Lucianus, Constantine, and others, which are all well preserved, and date from 200 to 300 A. D.

UNPRECEDENTED ATTRACTION. OVER A MILLION DISTRIBUTED.

LA S. L.

Louisiana State Lottery Company. Incorporated by the Legislature, for educational and charitable purposes, and its franchise made a part of the present state constitution in 1879 by an overwhelming popular vote. Its MAMMOTH DRAWINGS take place semi-annually, (June and December), and its Grand Single Number Drawings take place in each of the other ten months of the year, and are all drawn in public at the Academy of Music, New Orleans, La.

FAMED FOR TWENTY YEARS.

For integrity of its drawings, and prompt payment of prizes.

Attested as follows:

"We do hereby certify that we supervise the arrangement for all the monthly and semi-annual drawings of the Louisiana State Lottery Company, and in person manage and control the drawings themselves, and that the same are conducted with honesty, fairness, and in good faith toward all parties, and we authorize the company to use this certificate, with fac simile of our signatures attached, in its advertisements."

Commissioners.
